# ⠿⠿enabler⁴ᴮᴵᶻ as Project Platform

The enabler⁴ᴮᴵᶻ Project Platform offers the best framework conditions for smoothly functioning communication across locations. The platform makes information exchange easier via freely designable communicative spaces. Modules can be combined in any way and thus support the information and communication flow. Any form of dialogue of working groups across companies or locations is possible – and that easily and efficiently.
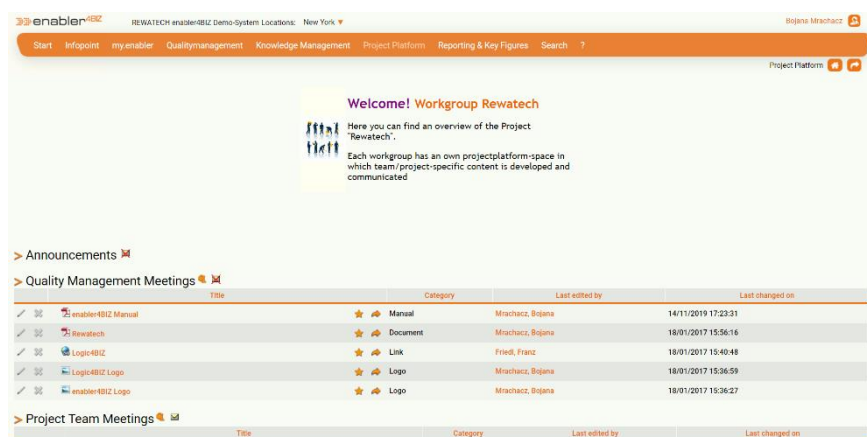

Modern technology for current projects

▶ Flexible management of project team members via clear administration possibilities

▶ Coordinated access to contents for every project team member via individually designable role concepts

▶ Project work across locations via modern web technology

Clear availability of relevant information

▶ Automatic notification mechanisms inform about changes and news on the platform in a timely manner

▶ Every project team member receives the project documents relevant for him/her and has continuing access to the current level of information – independent of the respective location

▶ Simple announcement modules and discussion forums make easy and fast communication possible – documented and structured

▶ If required, other websites can be integrated into your individual enabler⁴ᴮᴵᶻ Project Platform with a mouse click

enabler⁴ᴮᴵᶻ as Project Platform
